

# Industrial Construction

Experience is our strength.

R +I Rohr- und Industrieanlagen GmbH was founded in 1996 and is now a member of the HEAT Group. R +I is a renowned and internationally active industrial engineering company with headquarters in Austria.

With consequence and decades of experience, the company has established itself in a variety of applications. In addition to the construction of complete plants, R +I sees itself as partners of the industry, especially when it comes to maintenance and optimisation tasks. The activities of R +I are focused on long- term partnership and it is therefore to be understood that flexibility and premium versions count to the priorities of R +I. The customers of R +I - nationally and internationally - appreciate this commitment and honor the company therefore with long- term cooperation.
