Company History and Profile

Formerly known under the historical brand “SEAGUARD Cathodic Protection”, CMP Group S.r.l. – Europe Division is an European based Corrosion Engineering and Manufacturing company with decades of experience in the supply of cathodic protection products and services for international projects.

In July of 2019 Seaguard Italanodi Srl, partnered with Canada Metal (Pacific) Ltd, to form CMP Group – Europe Division for the purpose of supplying Cathodic Protection products and services to the global community from its facilities located in Europe (Genoa – Italy), North America (Vancouver – Canada), and Asia (Ningbo – China).

Originally "Seaguard Italanodi Srl" was established in Italy in 1972 (an associates company of Seaguard Ltd. London) and has been trading internationally in the design, production and supply of cathodic protection systems to assure a consistently high level of quality, technology and value.

Our company has held a leading position within the International Cathodic Protection Industry for about 50 years where we have provided high quality impressed current systems, sacrificial anodes and monitoring systems that have consistently exceeded our customers expectations.

CMP Group services include engineering, site servicing, installation assistance, as well as training and consultancy. Our main object has always been to provide the most effective and economic cathodic protection system.

Company History and Profile

We specialize in the design of products and protection processes for:

- Storage and Treatment Tanks (inside - outside)
 - Oil, Gas and Water pipelines;
- Power plant condensers and heat exchangers;
 - Water intake apparatus;
 - Jetties;
 - Offshore platforms;
- Buried and/or immersed structures;
 - Ships and offshore structures

CMP Group maintains a quality system that meets or exceeds all contract requirements. We are certified to the most recent International Quality Management Standard: ISO 9001:2015 "Design and production of Cathodic Protection Systems and Plants for Industrial and Marine application"

The Engineering Department is comprised of very experienced specialists who are "NACE certificated Level 3" and have maintained an active membership within national association for the protection against the electrolytic corrosions "APCE".
