

# Automation and SCADA systems for the complete water life cycle

## Automation and Software

Intesis provides automation, IT and Telematic services since 1988

INTESIS DESIGNS AND DEVELOPS:

- ➔ Automation, supervision and telecontrol system for the optimized management of water resources
- ➔ Control, data collection, monitoring and statistic analysis systems for industrial processes
- ➔ Energy saving solutions for distribution, environmental and industrial processes
- ➔ Video-supervision systems to ensure safety and monitoring of industrial and environmental processes
